

**THE RIGHT MIX**

The NI-900 integrated controller satisfies the control and automation requirements of smaller scale installations that support multiple IR devices, such as DVD players, satellite receivers, plasma displays and projectors.

The NI-900 includes:

- 1 - EIA RS-232/RS-422/RS-485 Port
- 3 - IR/Serial Output Ports
- 4 - Digital I/O Ports
- 1 - IR Receiver Port
- 1 - Ethernet 10/100 Port
- 1 - AXLink Connector

**THE FORM FACTOR**

Its compact size makes the NI-900 a perfect fit in any space - out of site behind a projection screen, hidden under a table, inside a podium or desk, or perhaps tucked away in a 1U rack mount with up to two other AMX devices.

**DUET COMPATIBLE**

The NI-900 is the first AMX device that leverages Duet Dynamic Device Discovery to automatically identify and communicate with connected devices. Duet compatibility also simplifies system programming by standardizing device and function definitions, default touch panel button assignments, and control and feedback methods.
